IRON AND STEEL ENGINEER INDEX FOR 1937

Herewith is presented the index of all authors, papers, and discussions published in the IRON AND STEEL ENGINEER for the year 1937.

LIST OF AUTHORS

A

AIRHART, GEORGE P.—*Reconditioning Flood Damaged Industrial Electrical Apparatus*, December 1937, 50.

B

BADLAM, STEPHEN—*Developments in Rolling Flat Steel Products in 1936*, January 1937, 20.

BEASLEY, H. V.—*Nickel Chilled Rolls and Some of Their Applications*, January 1937, 37.

BOOTH, J. J.—*Organization and Functions of a Maintenance Department*, December 1937, 18.

BURNETT, L. H.—*Fundamentals of Safety and Accident Prevention in Steel Plants*, July 1937, 43.

BURNETT, L. H.—*What Safety Has Contributed to Industry*, October 1937, 32.

BURR, WALTER H.—*Developments in the Iron and Steel Industry During 1936*, January 1937, 49.

BYE, NORMAN C.—*Heat Treating Furnace Specifications*, May 1937, 27.

C

CAMPBELL, C. B.—*Turbine Developments—Their Application in the Steel Industry*, September 1937, 48.

CONWAY, M. J.—*Furnace Pressure and Temperature Control for Side Door Heating Furnaces*, April 1937, 30.

COWAN, R. J.—*A Modern Annealing Plant for a Continuous Sheet Mill*, December 1937, 65.

CRANSON, ROBERT—*Flood Protection and Rehabilitation*, December 1937, 44.

CRATON, F. H.—*Diesel Electric Locomotives in Steel Mill Service*, August 1937, 31.

D

DARLING, A. G.—*Modern Steam Turbines in Steel Mills*, August 1937, 39.

E

EHRET, E. J.—*Centralized Lubrication in the Steel Industry*, February 1937, 19.

F

FISHER, A. J —*Furnace Atmosphere*, April 1937, 35.

FITCH, W. H.—*Tubular Recuperators Applied to Continuous Reheating Furnaces*, April 1937, 17.

FOX, GORDON—*A Study of Blast Furnace Charging*, March 1937, 13.

G

GEISE, AUGUST F., JR.—*The Continuous Rolling of Hot Strip Steel*, May 1937, 1.

GILLIES, F. M.—*Material Handling Facilities for Hot and Cold Strip Mills*, January 1937, 15.

GLASS, DR. S. W.—*The Measurement of the Frictional Characteristics of Brushes*, July 1937, 39.

H

HARLOW, F. J.—*Gas Distribution at River Rouge Plant, Ford Motor Company*, May 1937, 17.

HARRELL, F. E.—*Individual Motor Drives on Wide Strip Mills*, August 1937, 23.

HESTER, E. A.—*Flood Protection and Rehabilitation*, December 1937, 44.

HOBBS, M. H.—*Developments in Steel Plant Distribution Systems*, June 1937, 22.

HOUGH, W. R.—*Individual Motor Drives on Wide Strip Mills*, August 1937, 23.

HUGHES, GROVER A.—*Developments in Welding During 1936*, January 1937, 61.

HUGHES, T. E.—*Organization and Functions of a Maintenance Department*, December 1937, 18.

K

KELLY, JOHN JR.—*Who Should Represent the Steel Worker*, January 1937, 8.

KENYON, A. F.—*Electrical Operation of Cold Strip Mills*, July 1937, 27.

L

LEWIS, T. A.—*Steam Generation From Gas Engine Exhaust in America*, September 1937, 40.

LEUN, A. V.—*Refractories Application—The Trend in the Steel Plant*, March 1937, 36.

M

MACQUARRIE, F. L.—*Manufacture and Use of Iron and Steel Rolls*, November 1937, 18.

N

NIEDRINGHAUS, HAYWARD—*Hot and Cold Strip Mills—Granite City Steel Company*, May 1937, 38.

O

OFFILL, P. M.—*Soaking Pit Furnace—New Design and Operation*, June 1937, 17.

S

SMITH, E. W. P.—*Welding Economics and Application*, September 1937, 58.

SNYDER, W. B.—*Ward Leonard Control for Blooming and Slabbing Mill Auxiliaries*, May 1937, 30.

SOKOLSKY, GEORGE E.—*Economic Trend and Management's Job in Bringing About and Maintaining Satisfactory Employer-Employee Relations*, December 1937, 36.

SPITZGLASS, A. F.—*Automatic Control of Open Hearth Furnaces*, February 1937, 29.

STANIAR, WILLIAM—*Mechanical Transmission—Choosing the Correct Method*, June 1937, 31.

STONE, M.—*The Electrolytic Cleaning of Strip Steel*, October 1937, 27.

T

THELE, BIRGER—*Electrical Testing Department of a Large Steel Plant*, September 1937, 37.

TROSTEL, L. J.—*Modern Refractories for the Steel Industry*, March 1937, 24.

W

WERKING, L. C.—*Carbon—Corrosion Proof Tank Lining*, September 1937, 35.

WILLIAMS, C. H.—*Combination Fired Boilers—Carnegie-Illinois Steel Corporation*, November 1937, 43.

WHITE, F. S.—*Reconditioning Flood Damaged Industrial Electrical Apparatus*, December 1937, 50.

WHITE, W. H.—*Manufacture and Use of Iron and Steel Rolls*, November 1937, 18.

WOOD, H. H.—*Lubrication of Morgoil Roll Neck Bearings*, November 1937, 36.

WRIGHT, R. H.—*Drives and Control for a Modern Rod Mill*, October 1937, 35.

Y

YODER, CARL M.—*Cold Rolled Forming and Bending*, February 1937, 13.

YOUNG, JOHN L.—*Mechanical Developments of Modern Cold Rolled Strip Mills*, July 1937, 19.

LIST OF SUBJECTS

A

Accident Prevention in Steel Plants—Fundamentals of Safety and—By L. H. BURNETT, July 1937, 43.

A Modern Annealing Plant for a Continuous Sheet Mill—By R. J. COWAN, December 1937, 65.

A Study of Blast Furnace Charging—By GORDON FOX, March 1937, 13.

Aid the Steel Worker—Can Professional Labor Leaders—By JOHN KELLY, JR., February 1937, 11.

American Iron and Steel Institute—New Officers—June 1937, 49.

American Steel and Wire Company, Joilet, Illinois—New Continuous Rod Mills, July 1937, 50.

Analysis of Electric Motors Over 300 Horsepower Sold for Main Roll Drive Service in the Iron and Steel Industry in 1936—Statistics and—January 1937, 58.

Annealing Plant for a Continuous Sheet Mill—A Modern—By R. J. COWAN, December 1937, 65.

Apparatus—Reconditioning Flood Damaged Industrial Electrical—By GEORGE A. AIRHART, December 1937, 50.

Application in the Steel Industry—Turbine Developments—By C. B. CAMPBELL, September 1937, 48.

Application—Nickel Chilled Rolls and Some of Their—By H. V. BEASLEY, January 1937, 37.

Application—Welding Economics and—By E. W. P. SMITH, September 1937, 59.

Atmosphere—Furnace—By A. J. FISHER, April 1937, 35.

Automatic Control of Open Hearth Furnaces—By A. F. SPITZGLASS, February 1937, 29.

Auxiliaries—Ward Leonard Control for Blooming and Slabbing Mill—By W. B. SNYDER, May 1937, 30.

B

Bearings—Lubrication of Morgoil Roll Neck—By H. H. WOOD, November 1937, 36.

Bending—Cold Roll Forming and—By CARL M. YODER, February 1937, 13.

Bethlehem's Continuous Mill—April 1937, B-1.

Blast Furnace Charging—A Study of—By GORDON FOX, March 1937, 13.

Blooming and Slabbing Mill Auxiliaries—Ward Leonard Control for—By W. B. SNYDER, May 1937, 30.

Boilers at Carnegie-Illinois Steel Corporation—Combination Fired—By C. H. WILLIAMS, November 1937, 43.

Brushes—The Measurement of the Frictional Characteristics of—By DR. S. W. GLASS, July 1937, 39.

C

Can Professional Labor Leaders Aid the Steel Worker?—By JOHN KELLY, JR., February 1937, 11.

Carbon—Corrosion Proof Tank Lining—By L. C. WERKING, September 1937, 35.

Carnegie-Illinois Steel Corporation—Combination Fired Boilers at—By C. H. WILLIAMS, November 1937, 43.

Carnegie-Illinois Steel Corporation—Gary Sheet and Tin Division—September 1937, G-1.

Carnegie-Illinois Steel Corporation, Homestead, Pa.—New 100" Semi-Continuous Plate Mill—June 1937, H-1.

Centralized Lubrication in the Steel Industry—By E. J. EHRET, February 1937, 19.

Characteristics of Brushes—The Measurement of the Frictional—By DR. S. W. GLASS, July 1937, 39.

Characteristics—Steel Plant Power—January 1937, 45.

Charging—A Study of Blast Furnace—By GORDON FOX, March 1937, 13.

Chilled Rolls and Some of Their Applications—Nickel—By H. V. BEASLEY, January 1937, 37.

Choosing the Correct Method—Mechanical Transmission—By WILLIAM STANIAR, June 1937, 31.

Cleaning of Strip Steel—The Electrolytic—By M. STONE, October 1937, 27.

Cold Roll Forming and Bending—By CARL M. YODER, February 1937, 13.

Cold Rolled Strip Mills—Mechanical Developments of Modern—By JOHN L. YOUNG, July 1937, 19.

Cold Strip Mills—Electrical Operation of—By A. F. KENYON, July 1937, 27.

Cold Strip Mills—Granite City Steel Company—Hot and—By HAYWARD NIEDRINGHAUS, May 1937, 38.

Combination Fired Boilers at Carnegie-Illinois Steel Corporation—By C. H. WILLIAMS, November 1937, 43.

Continuous Mill—Bethlehem's—April 1937, B-1.

Continuous Reheating Furnaces—Tubular Recuperators Applied to—By W. H. FITCH, April 1937, 17.

Continuous Rod Mills, American Steel and Wire Company, Joilet, Illinois—New—July 1937, 50.

Continuous Rolling of Hot Strip Steel—The—By AUGUST F. GIESE, JR., May 1937, 1.

Continuous Sheet Mill—A Modern Annealing Plant for a—By R. J. COWAN, December 1937, 65.

Continuous Strip Mill—Inland's 76"—September 1937, I-1.

Control for Blooming and Slabbing Mill Auxiliaries—Ward Leonard—By W. B. SNYDER, May 1937, 30.

Control for a Modern Rod Mill—Drives and—By B. J. AUBURN AND R. H. WRIGHT, October 1937, 29.

Control of Open Hearth Furnaces—Automatic—By A. F. Spitzglass, February 1937, 29.

Control for Side Door Heating Furnaces—Furnace Pressure and Temperature—By M. J. Conway, April 1937, 30.

Corrosion Proof Tank Lining—Carbon—By L. C. Werking, September 1937, 35.

Crane Statistics—1936—Electrically Operated—January 1937, 60.

D

Developments in the Iron and Steel Industry During 1936—By Walter H. Burr, January 1937, 49.

Developments in Rolling Flat Steel Products in 1936—By Stephen Badlam, January 1937, 20.

Developments in Steel Plant Distribution Systems—By M. H. Hobbs, June 1937, 22.

Developments in Welding During 1936—By Grover A. Hughes, January 1937, 61.

Developments of Modern Cold Rolled Strip Mills—Mechanical—By John L. Young, July 1937, 19.

Developments—Their Application in the Steel Industry—Turbine—By C. B. Campbell, September 1937, 48.

Diesel Electric Locomotives in Steel Mill Service—By F. H. Craton, August 1937, 31.

Distribution at River Rouge Plant, Ford Motor Company—Gas—By F. J. Harlow, May 1937, 17.

Distribution Systems—Developments in Steel Plant—By M. H. Hobbs, June 1937, 22.

Discussion—A Study of Blast Furnace Charging—By S. L. Henderson, L. A. Deez, Gordon Fox and L. E. Riddle, March 1937, 13.

Discussion—Automatic Control of Open Hearth Furnaces—By G. M. Caughlin, A. F. Spitzglass, E. C. McDonald, M. J. Conway, M. J. Bradley and H. H. Gorrie, February 1937, 39.

Discussion—Combination Fired Boilers at Carnegie-Illinois Steel Corporation—By J. H. Strassburger and W. T. McCullough, November 1937, 61.

Discussion—Diesel Electric Locomotives in Steel Mill Service—By W. A. Marshall, O. Needham, C. C. Bailey, A. J. Standing, and F. H. Craton, August 1937, 39.

Discussion—Gas Distribution at Rouge Plant, Ford Motor Company—By M. J. Conway, E. L. Tindall, and K. Emmerling, May 1937, 25.

Discussion—Lubrication of Morgoil Roll Neck Bearings—By W. E. Hamilton, L. F. Coffin, G. S. Warren, H. A. Smith, and H. H. Wood, November 1937, 41.

Discussion—Material Handling Facilities for Hot and Cold Strip Mills—By G. S. Warren, and J. H. Vohr, January 1937, 19.

Discussion—Mechanical Transmission—Choosing the Correct Method—By L. F. Coffin, A. J. Standing, N. C. Bye, F. O. Schnure, R. W. Fuller, C. R. Hand, A. T. Halstead, C. D. Wright, D. Lee Chestnut, C. Royston and William Staniar, June 1937, 38.

Discussion—Modern Refractories for the Steel Industry—By Gilbert Soler, L. A. Smith and M. J. Conway, March 1937, 35.

Discussion—Refractories Application—The Trend in the Steel Plant—By L. A. Smith, E. E. Callinan, A. V. Leun, L. J. Trostel, M. J. Conway, W. F. Rochow and M. J. Terman, March 1937, 42.

Discussion—Ward Leonard Control for Blooming and Slabbing Mill Auxiliaries—By J. J. Booth and F. O. Schnure, May 1937, 35.

Drives and Control for a Modern Rod Mill—By B. J. Auburn and R. H. Wright, October 1937, 35.

Drives—Main Roll—Electric Motors Over 300 Horsepower Applied to—in the Iron and Steel and Allied Industries During the Year 1936, January 1937, 56-57.

Drives on Wide Strip Mills—Individual Motor—By F. E. Harrell and W. R. Hough, August 1937, 23.

E

Economics and Application—Welding—By E. W. P. Smith, September 1937, 59.

Economic Trend and Management's Job in Bringing About and Maintaining Satisfactory Employer-Employee Relations—By George E. Sokolsky, December 1937, 36.

Electric Motors Over 300 Horsepower Applied to Main Roll Drive Service in the Iron and Steel Industry in 1936—Statistics and Analysis of—January 1937, 56.

Electric Locomotives in Steel Mill Service—Diesel—By F. H. Craton, August 1937, 31.

Electrical Apparatus—Reconditioning Flood Damaged —Industrial—By George A. Airhart and F. S. White, December 1937, 50.

Electrical Operation of Cold Strip Mills—By A. F. Kenyon, July 1937, 27.

Electrically Operated Crane Statistics—1936—January 1937, 60.

Electrolytic Cleaning of Strip Steel—The—By M. Stone, October 1937, 27.

F

Facilities—Material Handling for Hot and Cold Strip Mills—By F. M. Gillies, January 1937, 15.

Fired Boilers at Carnegie-Illinois Steel Corporation—Combination—By C. H. Williams, November 1937, 43.

Flat Steel Products in 1936—Developments in Rolling—By Stephen Badlam, January 1937, 20.

Flood Damaged Industrial Electrical Apparatus—Reconditioning—By George P. Airhart and F. S. White, December 1937, 50.

Flood Protection and Rehabilitation—By Robert Cranson and E. A. Hestor, December 1937, 44.

Ford Motor Company—Gas Distribution at River Rouge Plant—By E. J. Harlow, May 1937, 17.

Forming and Bending—Cold Roll—By Carl M. Yoder, February 1937, 13.

Frictional Characteristics of Brushes—The Measurement of the—By Dr. S. W. Glass, July 1937, 39.

Functions of a Maintenance Department—Organization and—By J. J Booth and T. E. Hughes, December 1937, 18.

Fundamentals of Safety and Accident Prevention in Steel Plants—By L. H. Burnett, July 1937, 43.

Furnace Atmosphere—By A. J. Fisher, April 1937, 35.

Furnace—Carnegie-Illinois Opens New—March 1937, 48.

Furnace Charging—A Study of Blast—By Gordon Fox, March 1937, 13.

Furnace Pressure and Temperature Control for Side Door Heating Furnaces—By M. J. Conway, April 1937, 30.

Furnace Specifications—Heat Treating—By Norman C. Bye, May 1937, 27.

Furnaces—Automatic Control of Open Hearth—By A. F. Spitzglass, February 1937, 29.

Furnace—New Design and Operation—Soaking Pit—By P. M. Offill, June 1937, 17.

Furnaces—Furnace Pressure and Temperature Control for Side Door Heating—M. J. Conway, April 1937, 30.

G

Gary Sheet and Tin Division, Carnegie-Illinois Steel Corporation—September 1937, G-1.

Gas Distribution at River Rouge Plant, Ford Motor Company—By F. J. Harlow, May 1937, 17.

Gas Engine Exhaust in America—Steam Generation from—By T. A. Lewis, September 1937, 40.

Granite City Steel Company—Hot and Cold Strip Mills—By Hayward Niedringhaus, May 1937, 38.

H

Handling—Material Facilities for Hot and Cold Strip Mills—By F. M. Gillies, January 1937, 15.

Heat Treating Furnace Specifications—By Norman C. Bye, May 1937, 27.

Hot and Cold Strip Mills—Granite City Steel Company—By Hayward Niedringhaus, May 1937, 38.

Hot and Cold Strip Mills—Material Handling Facilities for—By F. M. Gillies, January 1937, 15.

Hot Strip Steel—The Continuous Rolling of—By August F. Giese, Jr., May 1937, 1.

I

Individual Motor Drives on Wide Strip Mills—By F. E. Harrell and W. R. Hough, August 1937, 23.

Industrial Electrical Apparatus—Reconditioning Flood—Damaged—By George P. Airhart and F. S. White, December 1937, 50.

Industry—What Safety Has Contributed to—By L. H. Burnett, October 1937, 32.

Inland's 76" Continuous Strip Mill—September 1937, I-1.

Iron and Steel Industry During 1936—Developments in the—By Walter H. Burr, January 1937, 49.

Iron and Steel Rolls—Manufacture and Use of—By W. H. White and F. L. MacQuarrie, November 1937, 18.

L

Locomotives in Steel Mill Service—Diesel Electric—By F. H. Craton, August 1937, 31.

Lubrication of Morgoil Roll Neck Bearings—By H. H. Wood, November 1937, 36.

Lubrication in the Steel Industry—Centralized—By E. J. Ehret, February 1937, 19.

M

Maintenance Department—Organization and Functions of a—By J. J. Booth and T. E. Hughes, December 1937, 18.

Main Roll Drives in the Iron and Steel and Allied Industries During the Year 1936—Electric Motors Over 300 Horsepower Applied to—January 1937, 56.

Maintaining Satisfactory Employer-Employee Relations—Economic Trend and Management's Job in Bringing About and—By George Sokolsky, December 1937, 36.

Management's Job in Bringing About and Maintaining Satisfactory Employer-Employee Relations—Economic Trend and—By George E. Sokolsky, December 1937, 36.

Manufacture and Use of Iron and Steel Rolls—By W. H. White and F. H. MacQuarrie, November 1937, 18.

Material Handling Facilities for Hot and Cold Strip Mills—By F. M. Gillies, January 1937, 15.

Measurement of the Frictional Characteristics of Brushes—The—By Dr. S. W. Glass, July 1937, 39.

Mechanical Transmission—Choosing the Correct Method—By William Staniar, June 1937, 31.

Mechanical Developments of Modern Cold Rolled Strip Mills—By John L. Young, July 1937, 19.

Method—Mechanical Transmission—Choosing the Correct—By William Staniar, June 1937, 31.

Mill—A Modern Annealing Plant for a Continuous Sheet—By R. J. Cowan, December 1937, 65

Mill Auxiliaries—Ward Leonard Control for Blooming and Slabbing—By W. B. Snyder, May 1937, 30.

Mill—Bethlehem's Continuous—April 1937, B-1.

Mill—Carnegie-Illinois Steel Corporation, Homestead, Pa.—New 100" Semi-Continuous Plate—June 1937, H-1.

Mill—Drives and Control for a Modern Rod—By B. J. Auburn, and R. H. Wright, October 1937, 35.

Mill—Republic Steel Corporation, South Chicago, Illinois—New Wire—May 1937, 36.

Mills—Electrical Operation of Cold Strip—By A. F. Kenyon, July 1937, 27.

Mills—Granite City Steel Company—Hot and Cold Strip—By Hayward Niedringhaus, May 1937, 38.

Mills—Hot and Cold Strip—Facilities for Handling Material for—F. M. Gillies, January 1937, 15.

Mills—Individual Motor Drives on Wide Strip—By F. E. Harrell and W. R. Hough, August 1937, 23.

Mills—Mechanical Developments of Modern Cold Rolled Strip—By John L. Young, July 1937, 19.

Modern Annealing Plant for a Continuous Sheet Mill-A—By R. J. Cowan, December 1937, 65.

Modern Cold Rolled Strip Mills—Mechanical Developments of—By John L. Young, July 1937, 19.

Modern Refractories for the Steel Industry—By L. J. Trostel, March 1937, 24.

Morgoil Roll Neck Bearings—Lubrication of—By H. H. Wood, November 1937, 36.

Motor Drives on Wide Strip Mills—Individual—By F. E. Harrell, and W. R. Hough, August 1937, 23.

N

New Continuous Rod Mills, American Steel and Wire Company, Joilet, Illinois,—July 1937, 50.

New Design and Operation—Soaking Pit Furnace—By P. M. Offill, June 1937, 17.

New 100" Semi-Continuous Plate Mill, Carnegie-Illinois Steel Corporation, Homestead, Pa.—June 1937, H-1.

New Tin Plate Mill at Niles, Ohio—Republic Steel, April 1937, 76.

New Wire Mill—Republic Steel Corporation, South Chicago, Illinois—May 1937, 36.

Nickel Chilled Rolls and Some of Their Applications—By H. V. Beasley, January 1937, 37.

O

Open Hearth Furnaces—Automatic Control of—By A. F. Spitzglass, February 1937, 29.

Operation of Cold Strip Mills—Electrical—By A. F. Kenyon, July 1937, 27.

Operation—Soaking Pit Furnace—New Design and—By P. M. Offill, June 1937, 17.

Organization and Functions of a Maintenance Department—By J. J. Booth and T. E. Hughes, December 1937, 18.

P

Plate Mill, Carnegie-Illinois Steel Corporation, Homestead, Pa.—New 100" Semi-Continuous—June 1937, H-1.

Power Characteristics—Steel Plant—January 1937, 45.

Protection and Rehabilitation—Flood—By Robert Cranson and E. A. Hester, December 1937, 44.

R

Reconditioning Flood Damaged Industrial Electrical Apparatus—By George P. Airhart and F. S. White, December 1937, 50.

Recuperators Applied to Continuous Reheating Furnaces—Tubular—By W. H. Fitch, April 1937, 17.

Refractories Application—The Trend in the Steel Plant—By A. V. Leun, March 1937, 36.

Refractories for the Steel Industry—Modern—By L. J. Trostel, March 1937, 24.

Rehabilitation—Flood Protection and—By Robert Cranson and E. A. Hester, December 1937, 44.

Reheating Furnaces—Tubular Recuperators Applied to Continuous—By W. H. Fitch, April 1937, 17.

Republic Steel Corporation, South Chicago, Illinois—New Wire Mill—May 1937, 36.

Republic Steel Opens New Tin Plate Mill at Niles, Ohio—April 1937, 76.

River Rouge Plant, Ford Motor Company—Gas Distribution at—By F. J. Harlow, May 1937, 17.

Rod Mill—Drives and Control for a Modern—By B. J. Auburn, and R. H. Wright, October 1937, 35.

Rod Mills, American Steel and Wire Company, Joilet, Illinois—New Continuous—July 1937, 50.

Rolling of Hot Strip Steel—The Continuous—By August F. Giese, Jr.—May 1937, 1.

Rolling Flat Steel Products in 1936—Developments in—By Stephen Badlam, January 1937, 20.

Roll Neck Bearings—Lubrication of Morgoil—By H. H. Wood, November 1937, 36.

Rolls—Manufacture and Use of Iron and Steel—By W. H. White and F. L. MacQuarrie, November 1937, 18.

S

Safety and Accident Prevention in Steel Plants—Fundamentals of—By L. H. Burnett, July 1937, 43.

Safety Has Contributed to Industry—What—By L. H. Burnett, October 1937, 32.

Semi-Continuous Plate Mill, Carnegie-Illinois Steel Corporation, Homestead, Pa.—New 100"—June 1937, H-1.

Sheet Mill—A Modern Annealing Plant for a Continuous—By R. J. Cowan, December 1937, 65.

Sheet and Tin Division, Carnegie-Illinois Steel Corporation—Gary—September 1937, G-1.

Side Door Heating Furnaces—Furnace Pressure and Temperature Control for—By M. J. Conway, April 1937, 30.

Soaking Pit Furnace—New Design and Operation—By P. M. Offill, June 1937, 17.

Specifications—Heat Treating Furnace—By Norman C. Bye, May 1937, 27.

Statistics and Analysis of Electric Motors Over 300 Horsepower Sold for Main Roll Drive Service in the Iron and Steel Industry in 1936—January 1937, 58.

Steam Generation From Gas Engine Exhaust in America—By T. A. Lewis, September 1937, 40.

Steel Mill Service—Diesel Electric Locomotives in—By F. H. Craton, August 1937, 31.

Steel Plants—Fundamentals of Safety and Accident Prevention in—By L. H. Burnett, July 1937, 43.

Steel Plant Distribution System—Developments in—By M. H. Hobbs, June 1937, 22.

Steel—The Continuous Rolling of Hot Strip—By August F. Giese, Jr.—May 1937, 1.

Steel Industry—Centralized Lubrication in the—By E. J. Ehret, February 1937, 19.

Steel Industry—Modern Refractories for the—By L. J. Trostel, March 1937, 24.

Steel Industry—Turbine Developments—Their Application in the—By C. B. Campbell, September 1937, 48.

Steel Plant Power Characteristics—January 1937, 45.

Steel Rolls—Manufacture and Use of Iron and—By W. H. White, and F. L. MacQuarrie, November 1937, 18.

Steel—The Electrolytic Cleaning of Strip—By M. Stone, October 1937, 27.

Steel Plant—Refractories Application—The Trend in the—By A. V. Leun, March 1937, 36.

Steel Worker—Can Professional Labor Leaders Aid the—By John Kelly, Jr., February 1937, 11.

Steel Worker—Who Should Represent the?—By John Kelly, Jr., January 1937, 8.

Strip Steel—The Electrolytic Cleaning of—By M. Stone, October 1937, 27.

Strip Mills—Electrical Operation of Cold—By A. F. Kenyon, July 1937, 27.

Strip Mills—Individual Motor Drives on Wide—By F. E. Harrell and W. R. Hough, August 1937, 23.

Strip Mill—Inland's 76" Continuous—September 1937, I-1.

Strip Mills—Mechanical Developments of Modern Cold Rolled—By John L. Young, July 1937, 19.

Study of Blast Furnace Charging—A—By Gordon Fox, March 1937, 13.

Systems—Developments in Steel Plant Distribution—By M. H. Hobbs, June 1937, 22.

T

Tank Lining—Carbon—Corrosion Proof—By L. C. Werking, September 1937, 35.

Temperature Control for Side Door Heating Furnaces—Furnace Pressure and—By M. J. Conway, April 1937, 30.

The Continuous Rolling of Hot Strip Steel—By August F. Giese, Jr., May 1937, 1.

The Measurement of the Frictional Characteristics of Brushes—By Dr. S. W. Glass, July 1937, 39.

The Electrolytic Cleaning of Strip Steel—By M. Stone, October 1937, 27.

Tin Division, Carnegie-Illinois Steel Corporation—Gary Sheet and—September 1937, G-1.

Tin Plate Mill at Niles, Ohio—Republic Steel Opens New—April 1937, 76.

Transmission—Choosing the Correct Method—Mechanical—By William Staniar, June 1937, 31.

Treating Furnace Specifications—Heat—By Norman C. Bye, May 1937, 27.

Trend in the Steel Industry—Refractories Application—The—By A. V. Leun, March 1937, 36.

Turbine Developments—Their Application in the Steel Industry—By C. B. Campbell, September 1937, 48.

Tubular Recuperators Applied to Continuous Reheating Furnaces—By W. H. Fitch, April 1937, 17.

W

Ward Leonard Control for Blooming and Slabbing Mill Auxiliaries—By W. B. Snyder, May 1937, 30.

Welding During 1936—Developments in—By Grover A. Hughes, January 1937, 61.

Welding Economics and Application—By E. W. P. Smith, September 1937, 59.

What Safety Has Contributed to Industry—By L. H. Burnett, October 1937, 32.

Who Should Represent the Steel Worker?—By John Kelly, Jr., January 1937, 8.

Wide Strip Mills—Individual Motor Drives on—By F. E. Harrell, and W. R. Hough, August 1937, 23.

Wire Mill—Republic Steel Corporation, South Chicago, Illinois—New—May 1937, 36.

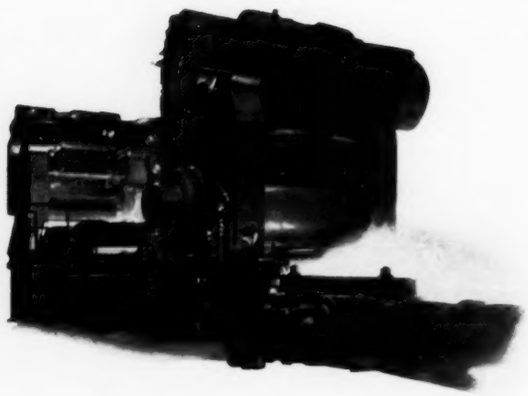
Y

Youngstown Sheet & Tube Company—Hot Strip Mills—February 1937, Y-1.

YEAR

1936—Developments in the Iron and Steel Industry During—By Walter H. Burr, January 1937, 49.

1936—Developments in Welding During—By Grover A. Hughes, January 1937, 61.

1936—Electrically Operated Crane Statistics—January 1937, 60.


1936—Statistics and Analysis of Electric Motors Over 300 Horsepower Sold for Main Roll Drive Service in the Iron and Steel Industry in—January 1937, 58.
